## One-Way Perspective Film

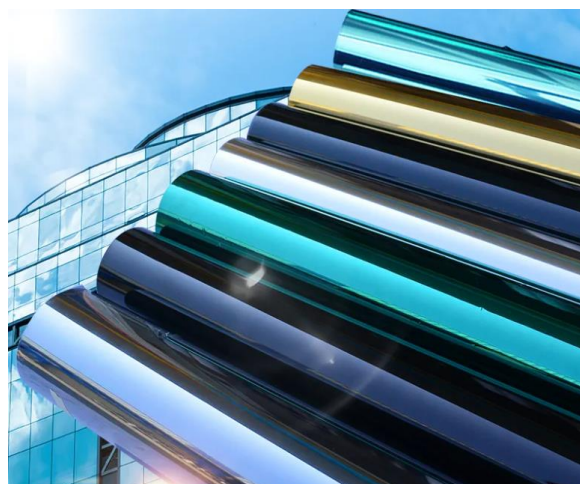

- ✓ Privacy Protection
- ✓ Heat Insulation and Energy Saving
- ✓ Static Cling and Non-Adhesive

Our PET/TPU one-way perspective film is the ultimate solution for protecting family privacy. It also provides heat insulation, UV isolation, improves microcosm, and enhances visual aesthetics.

### Key Features:

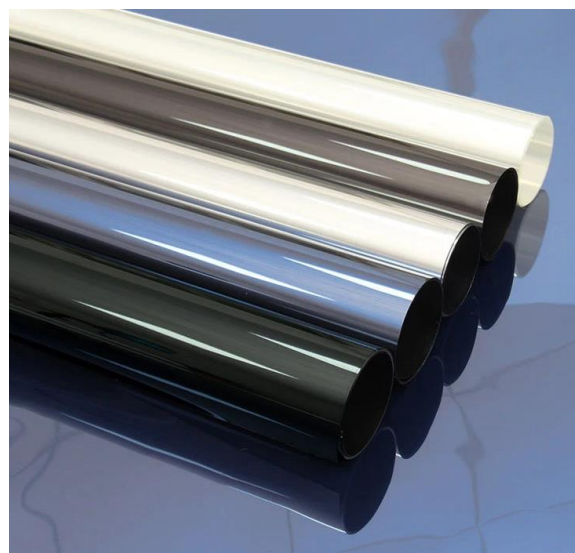

#### ➤ Privacy Protection

The one-way perspective film provides great privacy during daytime. It makes the outside glass shows mirror effect, causing the outside people unable to see inside while that inside can see outside. As the outside light becomes weaker, the mirror effect of outside glass will disappear gradually and outside people can see inside. When the inside light is stronger than outside, the mirror effect will be reversed. Remember to draw curtain during night.

#### ➤ Heat Insulation and Energy Saving

One-way perspective film blocks out 85% of infrared rays and 97% of UV rays reducing fading and aging of interior furnishings. The heat control one-way perspective film can retain heat in winter and keep it out in summer, reducing expensive heating and cooling costs.
