Reflective Sheeting

- ✓ High brightness
- ✓ Stable performance
- ✓ High weather resistance

Reflective sheeting is a special type of film that utilizes optical principles to reflect light back to the source. It consists of a weather-resistant film layer, a layer of tiny glass beads, a focusing layer, a reflective layer, an adhesive layer, and a release layer. Reflective sheeting can be categorized into different grades based on their varying retroreflective properties and uses.

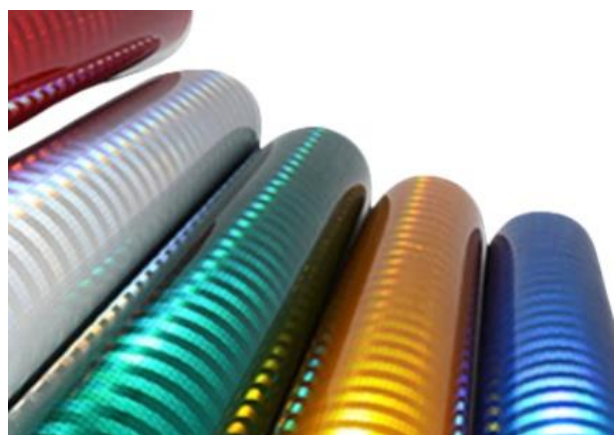

Key Features:

- High brightness and stable performance
- High weather resistance, more durable
- New super-strong adhesive, does not peel off in harsh environments

Application:

- **Engineering Grade Reflective Sheeting**
Applications: Temporary signs on highways, road signs for primary and secondary roads, underground parking lot signs, promotional signs, etc.
- **Super Engineering Grade Reflective Sheeting**
Applications: Reflective signs for rural roads, delineator posts, utility poles, signal poles, other traffic facilities, vehicle reflective stickers, work safety warning areas, municipal and highway signs.

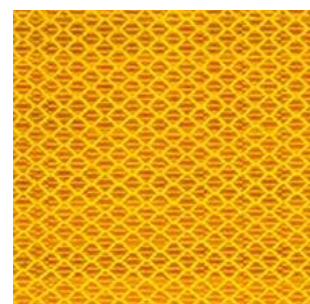

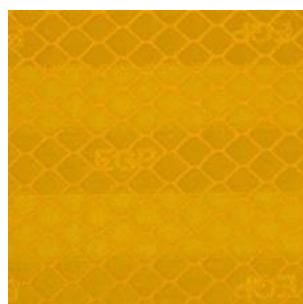

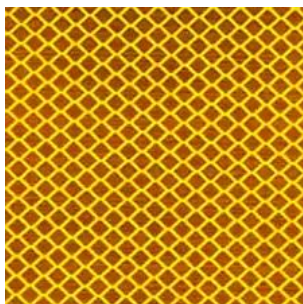

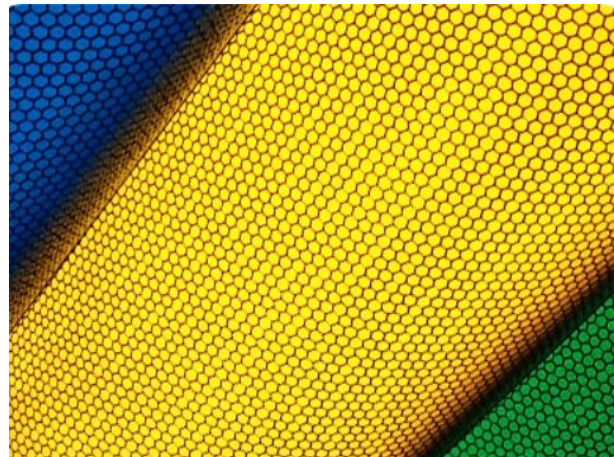

Mantis

Reflective Sheeting

- ✓ High brightness
- ✓ Stable performance
- ✓ High weather resistance

Application:

- **High Intensity Grade Reflective Sheeting**
Applications: Traffic signs and guide signs for various highways, railways, waterways, and urban main roads, safety signs for mines and airports, as well as reflective stickers for vehicles and ships.
- **Micro prismatic Reflective Sheeting**
Applications: Widely used for signage and sign stickers on highways, urban main roads, national roads, and high-grade roads.
- **Diamond Grade Reflective Sheeting**
Applications: Widely used for permanent signage on expressways, urban main roads, national highways, and high-grade highways.

Specification:

Item	I	II	III	IV	V
Name	Engineer Grade Reflective Sheeting	Super Engineering Grade Reflective Sheeting	High Intensity Grade Reflective Sheeting	Micro prismatic Reflective Sheeting	Diamond Grade Reflective Sheeting
Material	PET/Acrylic	Acrylic /PC/PET	PET/PC/PMMA	PMMA	PMMA
Size	1.22*45.72m/roll				
Color	Red, Yellow, Blue, Black, White, Orange, Brown, Green and etc.				
Life Span	5 Years	5 -7 Years	7 Years	7-10 Years	10 Years

- We offer a wide range of custom sizes and colors for your convenience.
