

Mantis Safety Mesh

- ✓ Anti Rebound
- ✓ Stable Performance
- ✓ Durability and Strength

Safety Mesh

Safety mesh, made from materials like polyethylene. Versatility, from construction sites to industrial facilities, safety mesh finds applications in various settings. Its flexibility in installation allows for customization to suit specific project needs, whether it's securing scaffolding, enclosing open edges, or creating temporary barriers. Cost-Effectiveness, investing in safety mesh is a cost-effective solution for construction companies. Its durability and reusability make it a long-term asset, reducing the need for frequent replacements and minimizing overall safety-related expenses.

Key Features:

- Temperature Control:
 - Regulate work environment temperature for improved comfort.
- Durability and Strength:
 - Robust materials ensure long-lasting performance on construction sites.
- Customizable Sizing:
 - Tailor-fit to your site's dimensions for optimal coverage.
- Enhanced Visibility:
 - Maintain well-lit and secure work areas without compromising shade.

Applications in Construction:

- Scaffold Cover:
 - Provide shade and protection for safer and more comfortable work on scaffolding.
- Material Storage:
 - Preserve construction materials by shielding them from the elements.
- Worksite Canopies:
 - Optimize productivity with shaded work areas during various construction activities.
- Temporary Shelters:
 - Create comfortable temporary shelters for workers.

Specifications

Australia and Europe Size (m):

1.83 m x 50 m roll, 30% block out, (Scaffold mesh option)
1.83 m x 50 m roll, 50% block out
1.83 m x 50 m roll, 70% block out
1.83 m x 30 m roll, 90% block out
1.83 m x 50 m roll, 90% block out
3.66 m x 50 m roll, 30% block out, (Scaffold mesh option)
3.66 m x 50 m roll, 50% block out
3.66 m x 50 m roll, 70% block out
3.66 m x 30 m roll, 90% block out

North America Size (ft):

6' x 165' roll, 30% block out, (Scaffold mesh option)
6' x 165' roll, 50% block out
6' x 165' roll, 70% block out
6' x 96' roll, 90% block out
6' x 165' roll, 90% block out
12' x 165' roll, 30% block out, (Scaffold mesh option)
12' x 165' roll, 50% block out
12' x 165' roll, 70% block out
12' x 96' roll, 90% block out

Mantis Safety Mesh

- ✓ Anti Rebound
- ✓ Stable Performance
- ✓ Durability and Strength

- Range: Commercial, Domestic, Fencing and Scaffolding
- Available colours: white, black, green, red, brown, yellow, blue, pink, etc.
- Material outdoor lifespan: UV stabilized for 10 years
- Logo printing: available
- GSM: 80g-300g

We offer a wide range of custom sizes, gsm and colours for your convenience.

Fire retardance in the material is optional.

Optimize Your Construction Site Today:
