## Glass Protection Roll

- ✓ Adhesive Backing
- ✓ Protection Against Scratches
- ✓ Durability

Glass protection rolls are a type of film used to protect glass surfaces such as windows, mirrors or glass doors from scratches, dirt, dust, paint splatters and other damage during construction, renovation or relocation. They are ideal for protecting glass surfaces during work in potentially damaging environments.

### Key Features:

- Adhesive Backing: These glass protection films usually come with an adhesive that is easy to apply and remove without leaving any residue or damaging the glass surface. The adhesive adheres securely but peels off simply and cleanly when the project is complete.
- Scratch protection: The film provides a layer of protection for glass against scratches caused by tools, construction debris, or other objects.
- Durability: Glass protection film is durable enough to resist punctures and tears, yet flexible enough to accommodate a variety of glass shapes and sizes.
- Transparency: Most temporary glass protection films are transparent, allowing the user to see clearly through the glass without compromising their vision.
- Water and dust resistance: Glass protection films are water resistant and can effectively protect glass from dust, dirt and paint splatters, preventing these substances from staining or damaging the glass surface.

## Glass Protection Roll

- ✓ Adhesive Backing
  - ✓ Protection Against Scratches
  - ✓ Durability
- UV Resistant: The glass protection film can be made UV resistant by adding UV resistant agent as needed.

### Applications:

- During Construction or Renovation: Protect windows and glass doors from dust, paint and debris.
- Moving Furniture: Ensure glass surfaces are protected from accidental impacts or scratches during the moving process.
- Commercial Or Residential Projects: This product is ideal for use in large commercial buildings, residential renovations, or during home improvement projects such as installing new counter tops or painting walls.

### Specifications:

Thickness (mm): 0.08 ± 0.005

Australia and Europe Size:

0.5m x 100m
0.8m x 100m
1.0m x 100m
1.2m x 100m
